IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 8/6/10 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609.01(B)(3) because the listed NPL document (a Japanese office action) is not in English, no English translation thereof has been provided, and no concise statement of relevance has been provided. It appears to be a document that has listed the other documents cited on the IDS, but the relevance of listing the Japanese office action itself has not been made apparent.

The IDS has been placed in the application file, but the information regarding to the NPL document referred to therein has not been considered as to the merits.

Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garth Dahlen (Reg. No. 43,575) on 9/24/10.

3. The application has been amended as follows (line numbers cited count fully deleted lines):

- In claim 1, at line 3, **delete** "mixture" and **insert** – mixture, the powdery mixture comprising at least the particulate elastomer and the carbonaceous material as solids -- after "powdery".
- In claim 1, at line 10, **delete** "there is a concentration of solids content of 50% or more by weight" and **insert** – a concentration of solid contents of the powdery mixture is 50% or more by weight, based on a total weight of the powdery mixture -- after "in a powdery form, ".
- In claim 1, at lines 17-18, **delete** "there is a concentration of solids content of 50% or more by weight" and **insert** – the concentration of the solid contents of the powdery mixture is 50% or more by weight, based on the total weight of the powdery mixture -- after "powdery mixture, ".
- **DELETE** claims 11 and 12.

Allowable Subject Matter

4. Claims 1-2 and 4-9 are allowed. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method for producing an electrode for an electric double layer capacitor, comprising all the limitations of claim 1, including forming the powdery mixture, wherein, at the time of mixing, a concentration

of solid contents of the powdery mixture is 50% or more by weight, and dry-forming said powdery mixture, wherein at the time of dry-forming the powdery mixture, the concentration of the solid contents of the powdery mixture is 50% or more by weight".

The closest prior art has been discussed in the previous office action:

- US 6,246,568 B1 ("Nakao"), teaches in column 18 that latex is added to activated carbon. The ranges of composition are broad, though, because the latex solids are 30-70% of the composition of its emulsion, which partially encompasses the claimed 50% or more, but partially misses this claimed value. The latex is then 1-200 parts by weight in 100 parts by weight of activated carbon. So while the very lowest of this reads on the 2-10% claimed value, most of it is larger. Thus, the teachings don't really suggest all of the claimed ranges together. Then, in each embodiment, there is a lot more water than solid parts. In column 21 in embodiment 17, for example, 500 parts water are used to 12 parts of latex and 10 parts of activated carbon. Thus, this isn't "dry-forming" with 50% or more concentration of solids.
- US 6,800,222 B1 ("Noguchi") teaches, in column 8, example 1, mixing 87% activated carbon, 10% acetylene black (similar to activated carbon), and 3% PTFE powder. These are mixed, extruded, and dry-formed by rolling. There isn't any teaching of solvents, so one would assume it meets the 50% or more solid contents. However, the PTFE is a different "binder" material than the particulate elastomer that is

claimed. The prior art does not make it obvious to use styrene/butadiene ("SBR") as a substitute for PFTE and used in dry form. Noguchi actually proposed using SBR (column 10, table, and lines 52+), blending 1% of it with 6% PFTE, and 85% activated carbon, but then took that blend and diluted it in water with 30% of the blend to 70% water. Thus, when SBR is used, it is diluted in 70% water, so this teaches against any straight use of SBR in Noguchi's example 1 in place of PTFE.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
